

Carbon Reduction Plan

Supplier Name: Agilité

Publication Date: 13/12/2024

Commitment to Achieving Net Zero

Agilité is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023

Additional Details relating to the Baseline Emissions calculations.

This baseline has been chosen as it is the first full scope 1, 2 and 3 emissions report for all operational and organisational activities.

Baseline year emissions:

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	6.06
Scope 2	1.66
Scope 3	Business Travel - 86.64 Commuting + Homeworking - 28.41 Waste - 43.10 Water - 0.18 Total WTT - 14.42 Deliveries Upstream - 24.44 Purchased Goods and Services - 5,730.07

Total Emissions 5,927.25

Current Emissions Reporting

Reporting Year: 2023

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	6.06
Scope 2	1.66
Scope 3	Business Travel - 86.64
(Included Sources)	Commuting + Homeworking - 28.41
	Waste - 43.10
	Water - 0.18
	Total WTT - 14.42
	Deliveries Upstream - 24.44
	Purchased Goods and Services - 5,730.07
Total Emissions	5,927.25

Emissions reporting for 2024 will begin on the 1st January 2025.

Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

We project that carbon emissions will decrease over the next twenty-seven years to 593.5 tCO₂e by 2050. This is a reduction of 90%

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. These measures will be in effect when performing the contract.

- Achievement and maintenance of ISO certification for 9001:2015 quality, 14001:2015 environmental and 45001:2018 occupational health and safety standards.
- Taking action to adapt to B Corp's new assessment system for 2026 and aiming to increase our score compared to our baseline (2023).
- A responsible procurement policy to ensure that materials and services are from legal and well-managed sources and that suppliers, contractors, and business partners can demonstrate responsible sourcing of their materials. Local sourcing of materials and subcontractors is also encouraged across all projects.
- Full Scope 1, 2 and 3 footprint measurement through the achievement of the Neutral Carbon Zone Gold Certification and LCAs to understand the impact of their projects.
- Public transport is encouraged for all business travel with all emissions offset through the GreenPerk partnership.

In the future, we hope to implement further measures such as:

- A set of sustainable procurement procedures and methodologies for all fit-out projects. These include having a list of approved suppliers scored based on their sustainability credentials, reusing or the use of reclaimed materials over new ones, aiming for sustainability certifications (such as BREEAM, WELL or LEED), and designing spaces in a way that consumption can easily be monitored and are efficiently designed.
- A supplier engagement programme through achieving the Neutral Carbon Zone Platinum Certification alongside the completion of LCAs for a range of projects as these are completed. Platinum Certification includes a full review of supply chain emissions to aid in revising and monitoring carbon reduction targets.
- Continued development of internal policies to encourage sustainable practices in office operations and also on all projects.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁽¹⁾ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁽²⁾.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁽³⁾.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Kirsty Shearer

operational excellence director
